GENERAL INF ORMATION

PROGRAMMING THE TIMER#1

⚠ DANGER ⚠

Electic Shock'Or Fire Hazard

READ ALL WIRE SIZI,GOLTAGE REQUIREMENT AND SAFETY DATAAVOID PROPERTY DAMAGE AND PERSONAL INJURY

■ Technical Data

- Operation Voltage:220-240VAC
- Frequency:50/60Hz
- AC switching capacity:16A/250VAC
- Inductive Load:5A
- Ambient Temperature:-10°C ~+20°C
- Accuracy:Type+-1s/day at+20°C
- Battery Backup:60days
- Minimum Programmable time:1Minute
- Maximum Programmable time:168Hours
- Maximum Programmes:17ON+17OFF
- Max Cable Size:6mm²

■ Operation Instruction

Programming Setting

Serial	Key	Programming
1	Press P once	Setting Channel(17 times ON/OFF setting are option)
2	Press D+	Select days of week(if you want same set in every day,need not press this key)
